# INTRODUCTION

As you enjoy the comforts of home and the hospitality of the hotel, take a moment to appreciate the invaluable gifts of water and energy. The seamless flow of water, the radiant glow of electricity enhancing your stay. In our Hotel Guest Tips booklet, we extend an invitation for you to embark on a journey of responsibility and sustainability.

On a global scale, resources are depleting due to escalating demands, but the UAE is

actively implementing measures to conserve and promote renewable energy. Now, the baton passes to you, to be a conscientious steward, safeguarding resources for the wellbeing of future generations.

Let's stand together for a brighter tomorrow. Every small effort counts - whether its saving water or turning off switches. Join us in creating a more sustainable and enjoyable future for all.

## SUGGESTIONS ON HOW TO CONSERVE WATER AND ELECTRICITY DURING YOUR STAY

- Report leaky faucets or toilets to the hotel management
- Try and take shorter showers to limit water consumption. Taking showers is more water-efficient than taking baths
- Do not throw trash down the toilet. Use the waste basket instead
- Re-use your towels more than once. Hang them if they are clean, and leave them on the floor if they need to be washed. One guest participating in a towel/sheet reuse program saves 4.5 gallons of water and 1/8 Cup of detergent per guestroom daily
- Re-use your bed linens. Sheets do not need to be changed and washed daily. Put a sign next to or on your bed requesting sheet change whenever you require it. The laundry operation of a large hotel can exceed 16 hours a day, which means a huge amount of water and electricity gets consumed daily just on laundry
- Turn off bathroom lights and the exhaust fan when you exit the washroom
- Turn off the lights when leaving the room
- Turn-off the AC if windows or balcony are opened.
- Set the thermostat at 24°C.

**Remember, small steps can go a long way in helping us to conserve our water and electricity; nothing is insignificant. These resources belong to all of us wherever you have come from. Be part of our green movement and help preserve our environment!**
